

YT200/YTA Temperature Transmitters

Course 1040

Course Description

This course consists of lectures, demonstrations, laboratory exercises, and question and answer sessions designed to familiarize the student with the features and operation of the YT200 and/or YTA temperature transmitters.

Duration

1/2 Day

Objectives/Outcomes

Upon completing the course, the learner will exhibit the ability to:

- Identify the major components and function of the YT200 / YTA
- Identify proper installation requirements
- Program the temperature transmitter
- Troubleshoot the temperature transmitter

Intended Audience

Users of the YT200 / YTA: Engineers, Technicians, and Service personnel responsible for installing and maintaining the YT200 / YTA temperature transmitters.

Course Prerequisites

None

Technical Requirements

- Familiarity with RTD and thermocouple mechanics would be helpful

Materials

Each learner will be provided with the appropriate course workbook. A calculator (not provided) would be helpful.

Course Schedule

This course is conducted upon REQUEST ONLY. Please call 1-800-524-7378 to request this course.
